💼 TECHNICAL EXPERIENCE

Hotel Reservation System
School Project | PHP, MySQL, JavaScript, HTML/CSS, PHPMailer
Designed and developed a full-featured hotel booking system with user and admin interfaces. Implemented room availability tracking, automated email confirmations using PHPMailer, Sweet Alert for improved user notifications, and a secure booking form connected to a MySQL database.

Language Translator Web App
Personal Project | JavaScript, HTML/CSS, API Integration
Created a responsive web app that translates text between multiple languages using a translation API. Included clean UI design, real-time results, and language detection for better user experience.
